MATCHMAKING, DISCUSSIONS INSPIRING TALKS & PITCHES

This day will be entirely devoted to innovative imaging and diagnostics. In addition to the many informative lectures by top speakers from the CMI-NEN consortium, there are various matchmaking opportunities with the interdisciplinary Center for Medical Imaging North East Netherlands (CMI-NEN) and you can join tours and discussions.

The symposium brings together clinical partners, business associates and researchers. We believe that collaboration and community building are central to this event to ultimately create an impact on healthcare through technology.
